PERFORMANCE ART CONTEXT

Performative Approaches in Art and Science using the Example of "Performance Art"

Version 0.2 - Marcus

PERFORMANCE ARRANGEMENTS

Performances as an SMS #2/16 of art
Marcus Maeder (Switzerland)
Mobile, synchronized with the Swiss Interplanetary Mint (SIM), Lampedusa
Whether and Weather Collection
Performance Arrangements (Performances carried out Thereafter)

Grid Views of the "Performative Turn"
A project initiated by Marcus Maeder (Switzerland) and Jan Deck (Germany)
Research model, visualization and development as an "Evolving" Knowledge Map
Performative Processes in Art, Science and Everyday Life (Performative processes from entertainment and play)

Performance is not an event, but an art. (Jan Deck)
Performance is not an event, but an attitude. (Marcus Maeder)
Performance is not an event, but a process. (Jan Deck)

The word composite in "performance" is a combination of "performare" (Latin) and "performer" (Old French) and means "to form completely".
Source of data from the collaborative platform of the "Virtual IT Bauhaus".
It is analytic and unbelievably "chaotic" - human complexity, art, science.

The visual structure of the mind map and the interrelationships between the individual terms are still in the process of development.

How can performances be analyzed?
In "pure science" with all the rigidity.
In "pure art" with all the freedom.
Being in the uncertainty and entrapment (Jan Deck) in between. - The meaning!

In "performance"
- the "pure" and the "applied" are interwoven in an inseparable (playing) game,
- science loses and the arts win the freedom of "creating" with limits.

A Poster Group by Gerhard Ertmann and Boris Nieslony
Performance Art Festival Aktionstage Politische Kunst, Munich (D), Glockenbachwerkstatt, 1984 - Glockenbachwerkstatt, 1985
Performance Art Festival Munich, Munich Performance Group
